

#jakob: The Modular Tool for Maintenance Staff in Heat Treatment

#jakob

CONDITIONING MONITORING

- Early detection of discrepancies
- supported by sensors
- Timely detection of downtimes
- Unplanned downtimes become plannable production downtimes

MAINTENANCE & NOTES

- Quick overview of all maintenance activities
- Smart maintenance documentation by use of image and sound
- Compact maintenance history

PREDICTIVE MAINTENANCE

 360

- Long-term prognosis tool for critical components
- Mathematical modelling made easy by simple presentation in the App

PARTS (ADD-ON)

- Representation of a plant in full detail
- Enables a more accurate location of all information

DOCUMENTATION (ADD-ON)

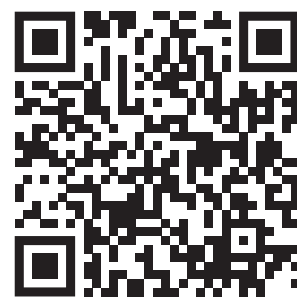

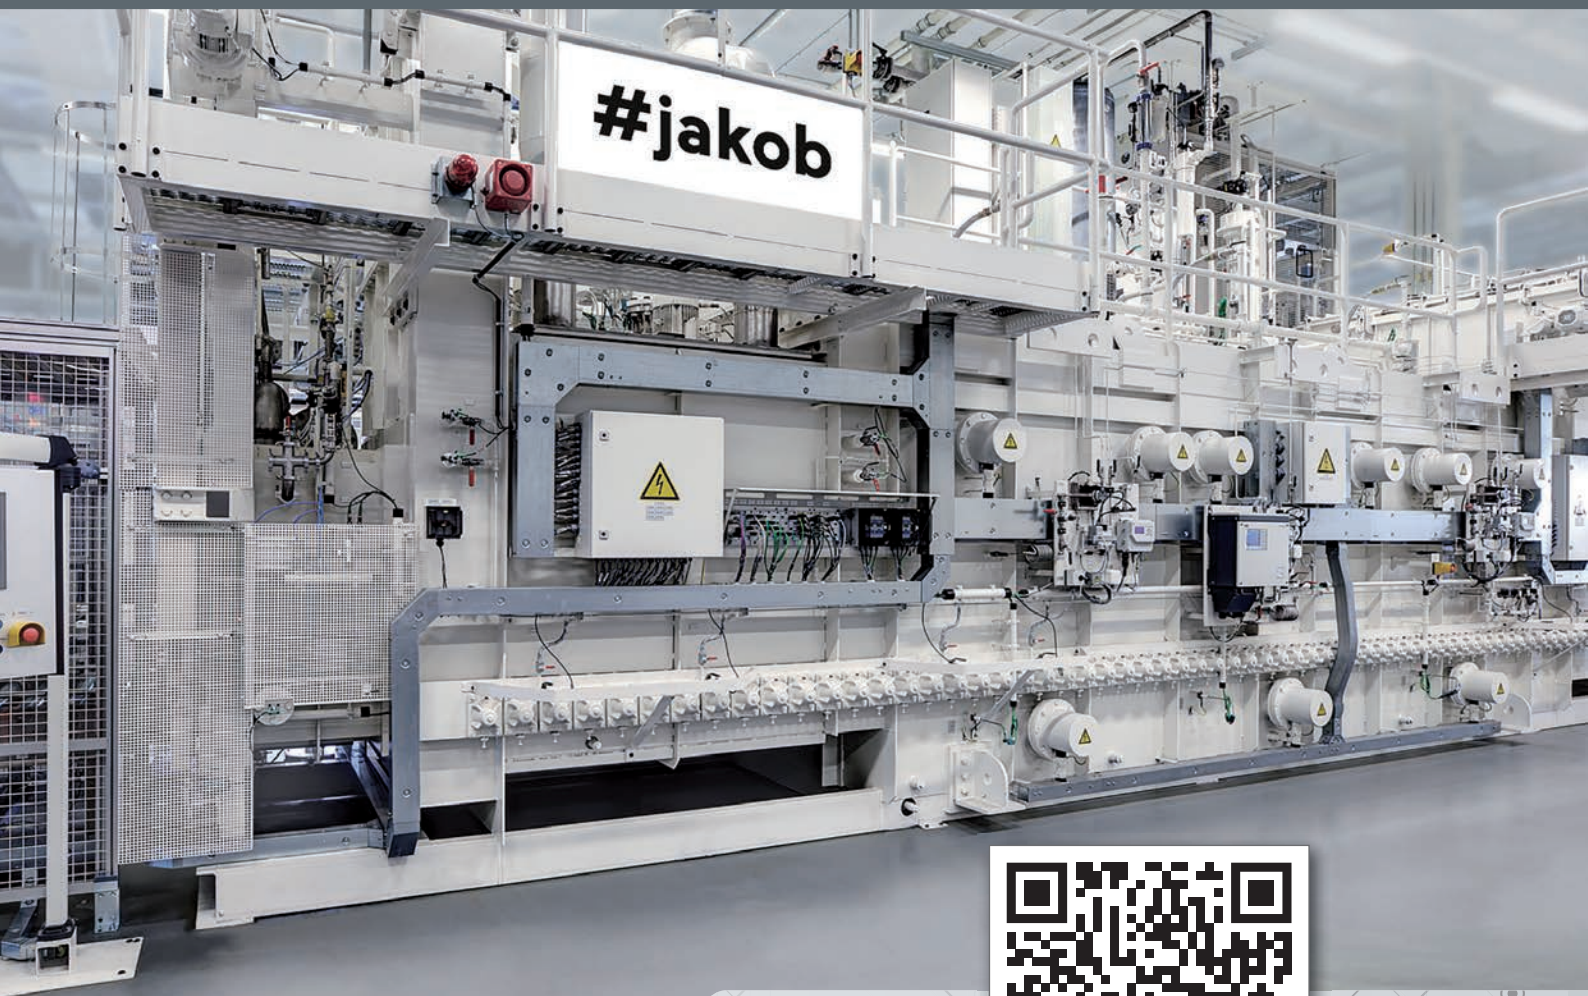

- Thousands of pages of data and information in one App
- Available anywhere, anytime
- Simple, fast, and safe

IDENTIFY (ADD-ON)

- AI supports article and components identification via photo function
- Use equipment identification (BMKZ) for easy navigation and identification
